1 Introduction

This document describes the Implementation Guide for CustomerCreditTransferInitiation ISO 20022 pain.001.001.02 in Handelsbanken.

The purpose of this Message Implementation Guide is to provide guidance for how information is structured in the exchange between the Handelsbanken and the customer.

Handelsbanken's message set-up complies with the international definitions for content and use of an ISO 20022 "BanktoCustomerDebitCreditNotification" message and Common Global Implementation (CGI).

1.1 Related documents

The documents below contain information to facilitate the implementation to execute payments in the ISO 20022 CustomerCreditTransferInitiation (pain.001) format;

- Handelsbanken ISO 20022 pain.001 version 2 – CustomerCreditTransfer Country Specific Information
- The ISO 20022 Message Definition Report (MDR), Message Usage Guideline (MUG) and XML Schema can be downloaded from http://www.iso20022.org/message_archive.page#PaymentsInitiation
- The Payments External Code List, which provides the standard values for payment message code elements, www.iso20022.org/external_code_list.page

1.2 History

New releases of the Implementation Guides are published on a regular basis, based on new versions of the underlying standards or to provide changes or clarifications. At Handelsbanken, changes to version numbers are made according to the following guidelines. The original version is 1.0.0.

- The last digit is changed when the format descriptions are changed, for example text clarifications and examples.
- The second digit is changed if minor changes are made to the format such as new countries or changes in the payment type.
- The first digit is changed (thus becoming a completely new version) if the format changes mean that the customer will have to make adaptations in order to continue using the service. In this case, all customers affected are informed of the new version and what the changes involve.

Version	Date	Description
1.0.7	2021-11-30	Minor updates
1.0.6	2021-06-14	The name for "national account number" is changed from BBAN to national account number
1.0.5	2020-10-23	Minor updates
1.0.4	2017-02-06	Duplicate check is made on the full length of the Message ID
1.0.3	2016-06-30	New codes for payments in CNY to creditors in China.
1.0.2	2013-12-12	BIC is optional if account number is stated as an IBAN.
1.0.1	2012-12-21	Minor changes and updates
1.0.0	2012-06-14	Published

2 General rules

It is currently possible to request payments from accounts with Handelsbanken in the following countries:

Denmark	Great Britain	Sweden
Finland	Luxembourg	USA
France	Netherlands	
Germany	Norway	

Payments can also be made from accounts held with other banks. The service is based on Handelsbanken having an agreement with the account holding bank in order to execute payments. Today we have agreements with approximately 60 different banks covering just over 40 different countries. The geographical coverage could be extended if the need should arise.

All component services within outgoing payments must have a separate agreement with Handelsbanken.

Please use the document Handelsbanken ISO 20022 pain.001 version 2 – CustomerCreditTransfer Country Specific Information for information on details about the payment types in each country.

2.1 IBAN as debtor or creditor account

Please note that there are country specific rules regarding whether IBAN or national account number could/should be used as debtor and creditor account, see country specific information for details.

2.2 Execution date/value date

Execution date/value date could be between same day and up to 12 months in the future depending on the type of payment. This means that Handelsbanken monitor payments with a future payment date.

Rules for payment initiation before execution date/value date for each payment type:

- Transfers within Handelsbanken – same day as receiving day.
- Local payments – up to 12 months.
- Cross-border payments up to 12 months, Monitored payments are sent at 7:00 CET on the execution date. Payments with “today” as the execution date are sent to the bank for execution after final authorisation.
- From accounts with other banks – depending on type of payment. Monitored payments are sent to the bank for execution in the morning, at 0:30 CET two days before the execution date. Payments with execution date “today” or up to two banking days ahead are sent to the bank for execution after final authorisation. The execution date will be the date on which the account will be debited.

2.3 Cut off times

A payment or a transfer must be made according to the cut-off times for each country. If Handelsbanken receives the order after the specific cut-off time, the transfer will be made on the following business day.

When the debit account is held with another bank, Handelsbanken will not check the cut-off time for any currency.

2.4 Character set

UNIFI messages the UTF8 encoding must be used. Encoding must be declared in the XML header.

Please note that it is only characters according to EBCDIC codepage 278 that are forwarded to the beneficiary and returned in any reporting.

2.5 Validation of messages and transactions

2.5.1 MESSAGE LEVEL

The pain.001 message will be validated against the schema pain.001.001.02.xsd. If the message is not valid to the schema, the whole message will be rejected. For all messages sent to the bank, the status will be displayed in Handelsbanken's online corporate banking service. CustomerPaymentStatusReport in pain.002 format can be agreed upon to facilitate automatic reconciliation.

2.5.2 TRANSACTION LEVEL

The single payments will be validated against the information needed for each payment system to correctly process the payments. If any mandatory data for the specific type of payment is missing or incorrect the payment will be rejected and the reason of rejection can be seen in Handelsbanken's Online corporate banking service. If agreed by the bank and the customer, a CustomerPaymentStatusReport will be sent (pain.002).

2.6 EUR payments within Europe (SEPA Credit Transfer)

This is only valid for EUR payments within the EU, EEA, Switzerland and Monaco. Please note that Handelsbanken does not act on the code SEPA in <SvcLvl> as the bank automatically classifies the payment as a EUR payment within Europe (SEPA Credit Transfer) if the following requirements for SEPA are fulfilled:

- Currency must be EUR (no limits for the amount)
- Payment has to be within EU, EEA, Switzerland and Monaco.
- Creditor's account identification must be an IBAN
- Creditor Agent must be a SEPA Credit Transfer participant
- ServiceLevel has to be set to NURG (non-urgent) or SEPA
- The ordering party should only pay Handelsbanken's fees (ChargeBearer should be set to SHAR or SLEV)

2.7 Remittance information to creditors in China

For payments in CNY to creditors in Mainland China the unstructured remittance information must begin with one of the following codes:

- /CGODDR/ - indicating cross-border goods trade
- /CSTRDR/ - indicating cross-border service trade
- /CCTFDR/ - indicating cross-border capital transfer
- /CCDNDR/ - indicating charity donation
- /COCADR/ - indicating other current account transactions

2.8 Payments in CNY offshore to Mainland China in China

For payments in CNY offshore to Mainland China, National bank Id together with BIC is mandatory.

3 Terms and concepts

3.1 Abbreviations

These abbreviations are frequently used and are important for the understanding of the message.

Term	Description
IBAN	International Bank Account Number – identifier used nationally and internationally by financial institutions. An IBAN consists of a country code, a control digit, a bank identifier and a national account number. A Swedish IBAN is made up of 24 characters in total and a foreign IBAN can be up to 34 characters.
SWIFT	SWIFT is the abbreviation of Society for Worldwide Interbank Financial Telecommunication and is a communications network used by most of the banks in the world for sending each other payment instructions and messages.
BIC	Business Identifier Code is made up of 8 or 11 characters. A unique address linked to SWIFT.

3.2 Parties

The different parties in the ISO concept are described in the table below.

Party ISO 20022	Synonym	Description
Debtor	Originator Ordering Party	The Party whose account is debited with the payment.
Ultimate Debtor	Originator Reference Party	The Party that originally ordered goods or services and to whom the seller has sent the invoice. Ultimate Debtor is used when the receiver of the invoice is different than the account owner.
Initiating Party	Instructing Party	The Party on the initiative of which the payment data is established. This can either be the debtor or the party that initiates the credit transfer on behalf of the debtor e.g. an agent, Service Bureau or a company's service centre.
Creditor	Beneficiary	The Party whose account is credited with the payment.
Ultimate Creditor	Ultimate Beneficiary Beneficiary Reference Party	The Party which is the ultimate beneficiary of the payment. For example the payment is credited to an account of a financing company, but the ultimate beneficiary is the customer of the financing company.
Debtor agent	Originator's, Bank Payer's Bank	The Bank where the Debtor has its account.
Creditor agent	Beneficiary's Bank, Seller's Bank	The Bank where the Creditor has its account.

3.3 References

The CustomerCreditTransferInitiation has the following possible references on the different levels in the message.

Reference type	Message position and tag name	Description
<GrpHdr>		
Message Id	<GrpHdr><MsgId>	Unique identification of the message.
<PmtInf>		
Payment Id	<PmtInf><PmtInfd>	Unique identification to unambiguously identify the payment information group within the message.
<CdtTrfTxInf>		
End-to-end Id (customer's own reference)	<CdtTrfTxInf><EndToEndId>	Unique identification, assigned by and used for debtor, to unambiguously identify the transaction. If the payment fulfils requirements for a SEPA payment, this will be passed on, unchanged, throughout the entire end-to-end chain. This identification is also returned in any reconciliation report on transaction level.
Creditor's Structured Reference Id	<CdtTrfTxInf><RmtInf><Strd><CdtrRefInf>< CdtrRef >	Unique and unambiguous structured identification, as assigned by the creditor, to unambiguously refer to the payment, e.g. KID, OCR or RF-reference.
Creditor's Referred Document Id	<CdtTrfTxInf><RmtInf><Strd><RfrdDocInf><Nb>	Unique and unambiguous identification of the referred document, e.g. Invoice Id or Credit Note Id. Assigned by the creditor,
Unstructured free text	<CdtTrfTxInf><RmtInf> <Ustrd>	Free text that can be used to help the creditor to identify the transaction if no structured identification is used.

4 Scenario

The purpose of this section is to basically describe the entire chain of electronic information exchange between the Debtor, the Debtor's Agent, the Creditor's Agent and the Creditor.

Please note that for all messages sent to the bank, the status of the message and the payment orders will be displayed in Handelsbanken online corporate banking service.

- 1) The Debtor sends a CreditTransferInitiation (pain.001) to the Debtor Agent.
- 2) The Debtor Agent validates the message and sends a PaymentStatusReport (pain.002) reporting if the file is rejected upon schema validation.
- 3) The information included in every single payment are validated against each payment system and the Debtor Agent sends a PaymentStatusReport (pain.002) to the Debtor, reporting the status on the file including information on rejected payments, if any.
- 4) The payments are processed between Debtor Agent and Creditor Agent on the agreed execution date.
- 5) If any of the payments are rejected on the execution day, the Debtor Agent sends a PaymentStatusReport (pain.002) reporting rejected payments to the Debtor.
- 6) Debtor Agent sends a Debit Notification report (camt.054) to the Debtor reporting executed payments.
- 7) Creditor Agent sends a Credit Notification report (camt.054) to the Creditor reporting incoming payments.
- 8) Debtor Agent and/or Creditor Agent sends an Interim AccountReport (camt.052) to the Debtor and/or Creditor.
- 9) Debtor Agent and/or Creditor Agent sends an Account Statement (camt053) to the Debtor and/or Creditor.

5 Format specification

This section consists of a technical description of the message type CreditTransferInitiation ISO 20022 pain.001.001.02. as approved for use in communication with Handelsbanken. Please note that it is possible to overpopulate the message and send more information than described in the implementation guide but Handelsbanken will not be able to process it further.

5.1 Message structure

The payment initiation message is composed of three parts: GroupHeader, PaymentInformation and CreditTransferTransactionInformation. The message may contain several PaymentInformation parts to which one or several CreditTransferTransactionInformation parts are included.

GroupHeader

This building block is mandatory. It contains common identifying elements to the entire message such as MessageIdentification, CreationDateAndTime, and Grouping indicator.

PaymentInformation

This building block is mandatory and repetitive. It contains elements related to the debit side of the transaction, such as Debtor, DebtorAccount Information and PaymentMethod.

CreditTransferTransaction Information

Transaction Information is part of the Payment Information block, is mandatory and can be repetitive. It contains information related to the credit side of the transaction, such as Creditor, CreditorAgent and RemittanceInformation.

5.2 Implementation guidelines

The order of the elements in the table follows the order of the elements in the schema. White rows are used for Message Items that can hold data and yellow rows are Message Items which are XML tags used for the data's structural position in the XML message.

The headings used in the format description are described in the table below.

ISO Index No.	Struct. Seq.	Message Item	Tag Name	Mult.	Status	Type
	-	pain.001.001.02	<pain.001.001.02>	[1..1]	M	
1.0	+	GroupHeader	<GrpHdr>	[1..1]	M	
1.1	++	MessageIdentification	<MsgId>	[1..1]	M	1-16 Text
1.2	++	CreationDateTime	<CreDtTm>	[1..1]	M	DateTime
1.5	++	NumberOfTransactions	<NbOfTx>	[1..1]	M	Numeric
1.6	++	ControlSum	<CtrlSum>	[0..1]	O	Numeric
1.7	++	Grouping	<Grpg>	[1..1]	M	Code(4)
1.8 +	++	InitiatingParty	<InitgPty>	[1..1]	M	

Heading	Description
ISO Index no	Reference number that points to the related field description in the ISO 20022 Message Definition Report (MDR).
Structural Sequence	Indication of the Message Items structural level in the message tree structure by the number of +-signs. Group Header <GrpHdr> and Payment Information <PmtInf> has one + as the two starting points in the message.
Message Item	A Message Item is a composing part of a Message. It can be a Message Element (which can be compared to the "fields" of a traditional message) or a Message Component (which can be compared to a block of information, consisting of different message elements).
Tag Name	A specific name assigned to a Message Item that will appear in the XML Schema and in XML instances that use this Message Item.
Multiplicity	Indicates whether a Message Item is optional, mandatory and/or repetitive due to ISO 20022 XML schema. Multiplicity is represented by a notation between square brackets as described below; [0..1] this element and all underlying elements in the tree (in the XML-schema) is optional and must be presented exactly once [0..n] this element this element is optional with unlimited repetition [1..1] this element is mandatory and must be present exactly once [1..n] this element is mandatory with unlimited repetition

Heading	Description
Status	Indicates the data's status due to Handelsbanken. Optional(O) = optional to include the data in the message Mandatory(M) = the data will be required to ensure a correct process of the payment Conditional(C) = the data is required for certain payments or required dependent on other data in the message Exclusive or(XOR) = one of many data should be used, but not multiple Required(R)= the data is mandatory if an optional or conditional data is used
Type	A Type Representation is used to group similar Types, such as Codes, Dates, Text, Numeric etc. If Handelsbanken has restrictions in the number of characters that differs from the schema, it will be stated in this column.

ISO Index No.	Struct. Seq.	Message Item	Tag Name	Mult.	Status	Type	Definition	Handelsbanken Special comments
	-	pain.001.001.02	<pain.001.001.02>	[1..1]	M			
1.0	+	GroupHeader	<GrpHdr>	[1..1]	M		Set of characteristics shared by all individual transactions included in the message	
1.1	++	MessageIdentification	<MsgId>	[1..1]	M	Text	Point to point reference, as assigned by the instructing party, and sent to the next party in the chain to unambiguously identify the message.	The Message ID must be unique as it is used for duplicate control. The Message ID is included in any ISO report from the bank.
1.2	++	CreationDateTime	<CreDtTm>	[1..1]	M	DateTime	Date and time at which the message was created. YYYY-MM-DDThh:mm:ss.sss	
1.5	++	NumberOfTransactions	<NbOfTxs>	[1..1]	M	Numeric	Number of individual transactions contained in the message.	Number of transactions is not checked by Handelsbanken. Number of transactions is returned in the pain.002 Status report.
1.6	++	ControlSum	<CtrlSum>	[0..1]	O	Numeric	Total of all individual amounts included in the message, irrespective of currencies.	The Control Sum is not checked by Handelsbanken. The Control Sum is returned in the pain.002 Status report.
1.7	++	Grouping	<Grpg>	[1..1]	M	Code(4)	Indicates whether common accounting information in the transaction is included once for all transactions or repeated for	Only MIXD (Mixed).
1.8 +	++	InitiatingParty	<InitgPty>	[1..1]	M		Party that initiates the payment.	E.g. Debtor or Service Bureau.
5.1.0	+++	Name	<Nm>	[0..1]	O	1-70 Text	Name by which a party is known and which is usually used to identify that party.	
5.1.10	+++	Identification	<Id>	[0..1]	O			
5.1.11	++++	OrganisationIdentification	<OrgId>	[1..1]	R		Unique and unambiguous way to identify an organisation.	
5.1.12	+++++	BIC	<BIC>	[0..1]	{XOR	Identifier	Business Identifier Code.	
5.1.14	+++++	BEI	<BEI>	[0..1]	XOR	Identifier	Business Entity Identifier.	
5.1.18	+++++	BankPartyIdentification	<BkPtyId>	[0..1]	XOR	Text	Unique and unambiguous assignment made by a specific bank to identify a relationship as defined between the bank and its client.	Swedish business organisation number or SHB number
5.1.20	+++++	ProprietaryIdentification	<PrtryId>	[0..1]	XOR}			
5.1.21	+++++	Identification	<Id>	[1..1]	R	Text	Name or number assigned by an entity to enable recognition of that entity, eg. account identifier.	
2.0	+	PaymentInformation	<PmtInf>	[1..n]	M		Set of characteristics that applies to the debit side of the payment transactions included in the credit transfer initiation.	
2.1	++	PaymentInformationIdentification	<PmtInfId>	[0..1]	M	Text	Unique identification, as assigned by a sending party, to unambiguously identify the payment information group within the message.	Included in any ISO report from the bank.
2.2	++	PaymentMethod	<PmtMtd>	[1..1]	M	Code(3)	Specifies the means of payment that will be used to move the amount of money.	TRF (Credit Transfer) CHK (Cheque)
2.3	++	PaymentTypeInformation	<PmtTpInf>	[0..1]	C		Set of elements used to further specify the type of transaction.	

ISO Index No.	Struct. Seq.	Message Item	Tag Name	Mult.	Status	Type	Definition	Handelsbanken Special comments
2.5	+++	ServiceLevel	<SvcLvl>	[0..1]	C		Agreement under which or rules under which the transaction should be processed.	Required at either Payment or Transaction Level if Service level should be set to URGP. Service Level on Credit Transfer Transaction Information overrides Service Level on Payment Information. See country specific information for details.
2.6	++++	Code	<Cd>	[1..1]	{XOR}	Code(4)	Identification of a pre-agreed level of service between the parties in a coded form.	SEPA (Single Euro Payment) Please note that Handelsbanken does not act on the code SEPA as the bank automatically classifies the payment as a EUR payment within Europe (SEPA Credit Transfer) if the requirements for SEPA are fulfilled
2.7	++++	Proprietary	<Prtry>	[1..1]	XOR}	Text(4)	Proprietary identification of a pre-agreed level of service between the parties.	NURG (Non Urgent) URGP (Urgent)
2.12	+++	CategoryPurpose	<CtgyPurp>	[0..1]	C	Code(4)	Specifies the high level purpose of the instruction based on a set of pre-defined categories.	SUPP (Supplier Payment) SALA (Salary Payment) INTC (Intra Company Payment) CORT (Financial Payment). Required at either Payment or Transaction Level if Category purpose should be set to SALA, INTC or CORT. Category Purpose on Credit Transfer Transaction Information overrides Category Purpose on Payment Information. See country specific information for details.
2.13	++	RequestedExecutionDate	<ReqdExctnDt>	[1..1]	M	DateTime	Date at which the initiating party requests the clearing agent to process the payment.	YYYY-MM-DD. When CategoryPurpose is set to CORT or INTC this field is regarded as value date, the date on which the receiving institution will receive value of the amount. Handelsbanken will automatically set the execution date to the date we receive the file and make the validation for the cut off time according to this information. The value date cannot be more than 7 calendar days ahead of time from the day the file is sent to the bank. See country specific information for details.
2.15	++	Debtor	<Dbtr>	[1..1]	M		Party that owes an amount of money to the (ultimate) creditor.	
5.1.0	+++	Name	<Nm>	[0..1]	O	1-70 Text	Name by which a party is known and which is usually used to identify that party.	
5.1.10	+++	Identification	<Id>	[0..1]	O			
5.1.11	++++	OrganisationIdentification	<Orgld>	[1..1]	R		Unique and unambiguous way to identify an organisation.	
5.1.12	+++++	BIC	<BIC>	[0..1]	{XOR}	Identifier	Business Identifier Code.	
5.1.14	+++++	BEI	<BEI>	[0..1]	XOR	Identifier	Business Entity Identifier.	
5.1.15	+++++	EANGLN	<EANGLN>	[0..1]	XOR	Identifier	Global Location Number.	
5.1.17	+++++	DUNS	<DUNS>	[0..1]	XOR	Identifier	Data Universal Numbering System.	
5.1.18	+++++	BankPartyIdentification	<BkPtyld>	[0..1]	XOR	Text	Unique and unambiguous assignment made by a specific bank to identify a relationship as defined between the bank and its client.	

ISO Index No.	Struct. Seq.	Message Item	Tag Name	Mult.	Status	Type	Definition	Handelsbanken Special comments
5.1.19	+++++	TaxIdentificationNumber	<TaxIdNb>	[0..1]	XOR	Text	Number assigned by a tax authority to an entity.	
5.1.20	+++++	ProprietaryIdentification	<PrtryId>	[0..1]	XOR}			
5.1.21	+++++	Identification	<Id>	[1..1]	R	Text	Name or number assigned by an entity to enable recognition of that entity, eg. account identifier.	
5.1.41	+++	CountryOfResidence	<CtryOfRes>	[0..1]	C	Code		See country specific information for Sweden
2.16	++	DebtorAccount	<DbtrAcct>	[1..1]	M		Unambiguous identification of the account of the debtor to which a debit entry will be made as a result of the transaction.	See country specific information for details on which format (IBAN/national account number) to be used for each country and payment type.
1.1.0	+++	Identification	<Id>	[1..1]	M		Unique and unambiguous identification for the account between the account owner and the account servicer.	
1.1.1	++++	IBAN	<IBAN>	[1..1]	{XOR	Identifier	International Bank Account Number (IBAN) - identifier used internationally by financial institutions to uniquely identify the account of a customer.	
1.1.2	++++	BBAN	<BBAN>	[1..1]	XOR	Identifier	Basic Bank Account Number.	See country specific information for details.
1.1.4	++++	ProprietaryAccount	<PrtryAcct>	[1..1]	XOR}		Account number used by financial institutions in individual countries to identify an account of a customer, but not necessarily the bank and branch of the financial institution in which the account is held.	
1.1.5	+++++	Identification	<Id>	[1..1]	R	Text	Name or number assigned by an entity to enable recognition of that entity, eg. account identifier.	SE: Used for Bankgiro number
2.17	++	DebtorAgent	<DbtrAgt>	[1..1]	M		Financial institution servicing an account for the debtor.	According to business rules, is DebtorAgentId not mandatory when DebtorAccount is stated as IBAN. "NOTPROVIDED" could be written as <Proprietary><Identification> instead of BIC.
4.1.0	+++	FinancialInstitutionIdentification	<FinInstId>	[1..1]	M		Unique and unambiguous identification of a financial institution, as assigned under an internationally recognised or proprietary identification scheme.	
4.1.1	++++	BIC	<BIC>	[1..1]	{XOR	Identifier	Business Identifier Code. Code allocated to financial institutions by the Registration Authority.	See country specific information for BICs in Handelsbanken.
4.1.2	++++	ClearingSystemMemberIdentification	<ClrSysMmbld>	[1..1]	XOR		Information used to identify a member within a clearing system.	
4.1.3	+++++	Identification	<Id>	[1..1]	R	Code	Identification for a clearing system member, identified in the list of clearing system member identifications.	A code from the external code list at www.iso20022.org should be used.
4.1.16	++++	ProprietaryIdentification	<PrtryId>	[1..1]	XOR}			
4.1.17	+++++	Identification	<Id>	[1..1]	R	Text		Only "NOTPROVIDED" is allowed if BIC is unknown.
2.19	++	UltimateDebtor	<UltmtDbtr>	[0..1]	O		Ultimate party that owes an amount of money to the (ultimate) creditor.	
5.1.0	+++	Name	<Nm>	[0..1]	O	1-70 Text	Name by which a party is known and which is usually used to identify that party.	
5.1.10	+++	Identification	<Id>	[0..1]	O		Unique and unambiguous identification of a party,	
5.1.11	++++	OrganisationIdentification	<OrgId>	[1..1]	{XOR		Unique and unambiguous way to identify an organisation.	
5.1.12	+++++	BIC	<BIC>	[0..1]	{{XOR	Identifier	Business Identifier Code	
5.1.14	+++++	BEI	<BEI>	[0..1]	XOR	Identifier	Business Entity Identifier.	
5.1.15	+++++	EANGLN	<EANGLN>	[0..1]	XOR	Identifier	Global Location Number.	
5.1.17	+++++	DUNS	<DUNS>	[0..1]	XOR	Identifier	Data Universal Numbering System.	

ISO Index No.	Struct. Seq.	Message Item	Tag Name	Mult.	Status	Type	Definition	Handelsbanken Special comments
5.1.18	+++++	BankPartyIdentification	<BkPtyId>	[0..1]	XOR	Text	Unique and unambiguous assignment made by a specific bank to identify a relationship as defined between the bank and its client.	
5.1.19	+++++	TaxIdentificationNumber	<TaxIdNb>	[0..1]	XOR	Text	Number assigned by a tax authority to an entity.	
5.1.20	+++++	ProprietaryIdentification	<PrtryId>	[0..1]	XOR}}		Unique and unambiguous identifier for an organisation that is allocated by an institution.	
5.1.21	+++++	Identification	<Id>	[1..1]	R	Text	Name or number assigned by an entity to enable recognition of that entity, eg. account identifier.	
5.1.23	++++	PrivateIdentification	<PrvtId>	[1..1]	XOR}		Unique and unambiguous identification of a person, e.g. passport.	
5.1.24	+++++	DriversLicensesNumber	<DrvrLicNb>	[1..1]	{{XOR	Text	Number assigned by a license authority to a driver's license.	
5.1.25	+++++	CustomerNumber	<CstmrNb>	[1..1]	XOR	Text	Number assigned by an agent to identify its customer.	
5.1.26	+++++	SocialSecurityNumber	<SciSctyNb>	[1..1]	XOR	Text	Number assigned by a social security agency.	
5.1.27	+++++	AlienRegistrationNumber	<AlnRegnNb>	[1..1]	XOR	Text	Number assigned by a government agency to identify foreign nationals.	
5.1.28	+++++	PassportNumber	<PsptNb>	[1..1]	XOR	Text	Number assigned by a passport authority to a passport.	
5.1.29	+++++	TaxIdentificationNumber	<TaxIdNb>	[1..1]	XOR	Text	Number assigned by a tax authority to an entity.	
5.1.30	+++++	IdentityCardNumber	<IdntyCardNb>	[1..1]	XOR	Text	Number assigned by a national authority to an identity card.	
5.1.31	+++++	EmployerIdentificationNumber	<MplyrIdNb>	[1..1]	XOR	Text	Number assigned to an employer by a registration authority.	
5.1.37	+++++	OtherIdentification	<OthrdId>	[1..1]	XOR}}			
5.1.38	+++++	Identification	<Id>	[1..1]	R	Text	Identifier issued to a person for which no specific identifier has been defined.	
5.1.39	+++++	IdentificationType	<IdTp>	[1..1]	R	Text	Specifies the nature of the identifier.	Only OTHR
2.20	++	ChargeBearer	<ChrgBr>	[0..1]	C	Code(4)	Specifies which party/parties will bear the charges associated with the processing of the payment transaction.	SHAR (Shared) CRED (Borne By Creditor) DEBT (Borne By Debtor) SLEV (Following Service Level). Required at either Payment or Transaction Level for Cross border payments. Charge Bearer on Credit Transfer Transaction Information overrides Charge Bearer on Payment Information. Not used for local payments or GlobalOn-Line Intra-group transfers. See country specific information for details.
2.23	++	CreditTransferTransactionInformation	<CdtTrfTxInf>	[1..n]	M		Set of elements used to provide information on the individual transaction (s) included in the message.	
2.24	+++	PaymentIdentification	<PmtId>	[1..1]	M		Set of elements used to reference a payment instruction.	
2.25	++++	InstructionIdentification	<InstrId>	[0..1]	C	Text	Unique identification assigned by the debtor to unambiguously identify the instruction.	If present will be included in any ISO report from the bank.
2.26	++++	EndToEndIdentification	<EndToEndId>	[1..1]	M	Text	Unique identification assigned by the debtor to unambiguously identify the transaction.	Own reference on transaction level i.e. per payment, included in the reports from the bank. Only sent to the creditor when SEPA payment.

ISO Index No.	Struct. Seq.	Message Item	Tag Name	Mult.	Status	Type	Definition	Handelsbanken Special comments
2.27	+++	PaymentTypeInformation	<PmtTplnf>	[0..1]	C		Set of elements used to further specify the type of transaction.	
2.29	++++	ServiceLevel	<SvcLvl>	[0..1]	C		Aggrement under which or rules under which the transaction should be processed.	Required at either Payment or Transaction Level if Service level should be set to URGP. Service Level on Credit Transfer Transaction Information overrides Service Level on Payment Information. See country specific information for details.
2.30	+++++	Code	<Cd>	[1..1]	{XOR	Code(4)	Identification of a pre-agreed level of service between the parties in a coded form.	Only SEPA (Single Euro Payment)
2.31	+++++	Proprietary	<Prtry>	[1..1]	XOR}	Text	Proprietary identification of a pre-agreed level of service between the parties.	NURG (Non Urgent) URGP (Urgent)
2.36	++++	CategoryPurpose	<CtgyPurp>	[0..1]	C	Code(4)	Specifies the high level purpose of the instruction based on a set of pre-defined categories.	SUPP (Supplier Payment) SALA (Salary Payment) INTC (Intra Company Payment) CORT (Financial Payment). Required at either Payment or Transaction Level if Category purpose should be set to SALA, INTC or CORT. Category Purpose on Credit Transfer Transaction Information overrides Category Purpose on Payment Information. See country specific information for details.
2.37	+++	Amount	<Amt>	[1..1]	M			
2.38	++++	InstructedAmount	<InstdAmt>	[1..1]	M	Amount	Amount of money to be moved between the debtor and creditor, before deduction of charges, expressed in the currency as ordered by the initiating party.	According to the ISO20022 standard InstructedAmount must be larger than zero.
2.42	+++	ExchangeRateInformation	<XchgRateInf>	[0..1]	C		Set of elements used to provide details on the currency exchange rate and contract.	Exchange Rate Information could be used from accounts in Handelsbanken DE, DK, FI, FR, GB, HK, LV, NL, PL, SG and US. Other banks, according to agreement.
2.43	++++	ExchangeRate	<XchgRate>	[0..1]	O	Rate	The factor used for conversion of an amount from one currency to another. This reflect the price at which one currency was bought with another currency.	
2.45	++++	ContractIdentification	<CtrctId>	[0..1]	R	Text	Unique and unambiguous reference to the foreign exchange contract agreed between the initiating party/creditor and the debtor agent.	

ISO Index No.	Struct. Seq.	Message Item	Tag Name	Mult.	Status	Type	Definition	Handelsbanken Special comments
2.46	+++	ChargeBearer	<ChrgBr>	[0..1]	C	Code(4)	Specifies which party/parties will bear the charges associated with the processing of the payment transaction.	SHAR (Shared) CRED (Borne By Creditor) DEBT (Borne By Debtor) SLEV (Following Service Level). Required at either Payment or Transaction Level for Cross border payments. Charge Bearer on Credit Transfer Transaction Information overrides Charge Bearer on Payment Information. Not used for local payments or GlobalOn-Line Intra-group transfers. See country specific information for details.
2.47	+++	ChequeInstruction	<ChqInstr>	[0..1]	C		Information related to the issuance of a cheque.	Required if Payment Method=CHK.
3.1.0	++++	ChequeType	<ChqTp>	[0..1]	R	Code(4)	Specifies the type of cheque to be issued.	Only BCHQ (Bank Cheque)
2.48	+++	UltimateDebtor	<UltmtDbtr>	[0..1]	O		Ultimate party that owes an amount of money to the (ultimate) creditor.	Ultimate Debtor on Credit Transfer Transaction Information overrides Ultimate Debtor on Payment Information.
5.1.0	++++	Name	<Nm>	[0..1]	O	1-70 Text	Name by which a party is known and which is usually used to identify that party.	
5.1.10	++++	Identification	<Id>	[0..1]	O		Unique and unambiguous identification of a party,	
5.1.11	+++++	OrganisationIdentification	<OrgId>	[1..1]	{XOR		Unique and unambiguous way to identify an organisation.
